The screenshot shows the phpMyAdmin web interface in a browser. The address bar indicates the URL: localhost/phpmyadmin/index.php?route=/sql&db=dbapi&table=dosen&pos=0. The interface displays the 'dosen' table structure and data. The table has columns: nid, nidn, nama, jk, prodi, and jabatan. The data is as follows:

	nid	nidn	nama	jk	prodi	jabatan
<input type="checkbox"/>	1	6001	Fahmi Mongo	L	TIF	DLB
<input type="checkbox"/>	2	6002	Freddy W.M.Kom	L	08976543234	DT
<input type="checkbox"/>	3	6003	Agust Isa Martinus, M.T	L	0856543456	DT
<input type="checkbox"/>	4	6004	Harry Gunawan, M.kom	L	0876897654	DT
<input type="checkbox"/>	7	5678	Haris	L	08964553	DLB
<input type="checkbox"/>	9	6007	Arie Susetyo	P	IND	Kaprodi
<input type="checkbox"/>	12	6008	Dian Novianti, M.Kom	P	TIF	Kaprodi

The screenshot shows the PyAthlon v1.0 web interface. It displays the table 'dosen' with its primary key 'nid' and unique key 'nidn'. The interface includes a 'Generate' button and a 'Generate PHP Class' button. The output shows the generated PHP Class and PHP API code.

PyAthlon v1.0
Generate REST-API Application Using Python-PHP-MySQL

No	Table Name	Primary Key	Unique Key	Generate
1	dosen	nid Primary Key name	nidn Unique Key name	PHP Class PHP API
